- Questions

# CERV Overview

BASE SYSTEM INCLUDES

- **CERV Smart Ventilation** sets the standard for superior indoor air quality
  - Measures Temp, RH%, CO<sub>2</sub>, and VOCs
  - Automatically accounts for changes in pollution levels and occupancy
  - Senses poor air quality before you do
    - High CO<sub>2</sub> and VOC levels occur much sooner than indicated by odors or discomfort
  - Adjusts for opening of doors, windows, and infiltration
  - Optimized for energy conservation
  - Use data metrics to provide user feedback to improve air quality

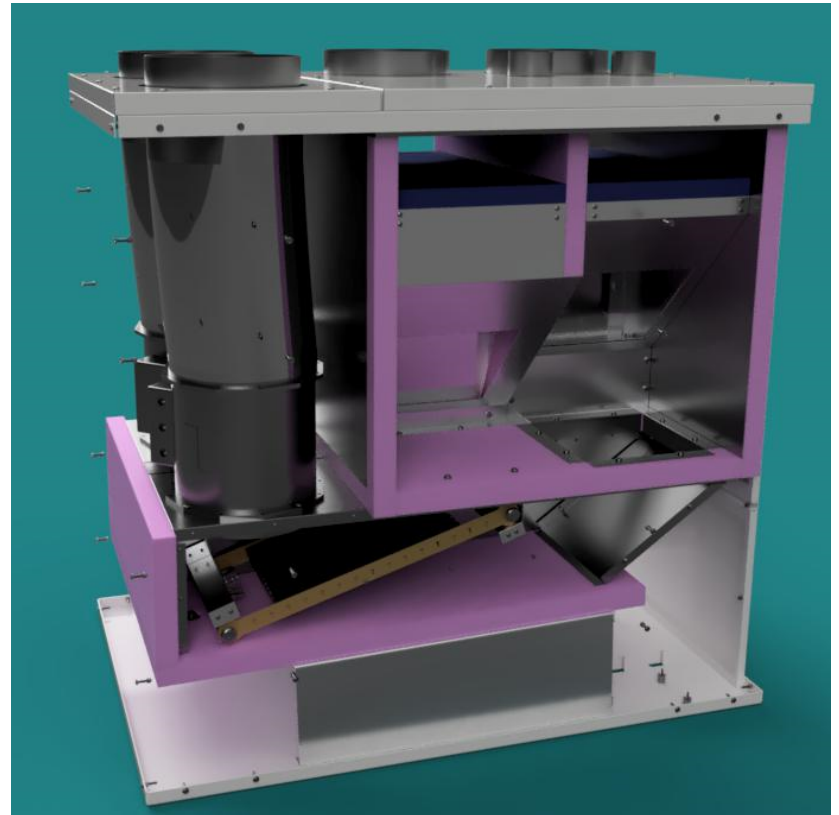

# CERV2 Configuration

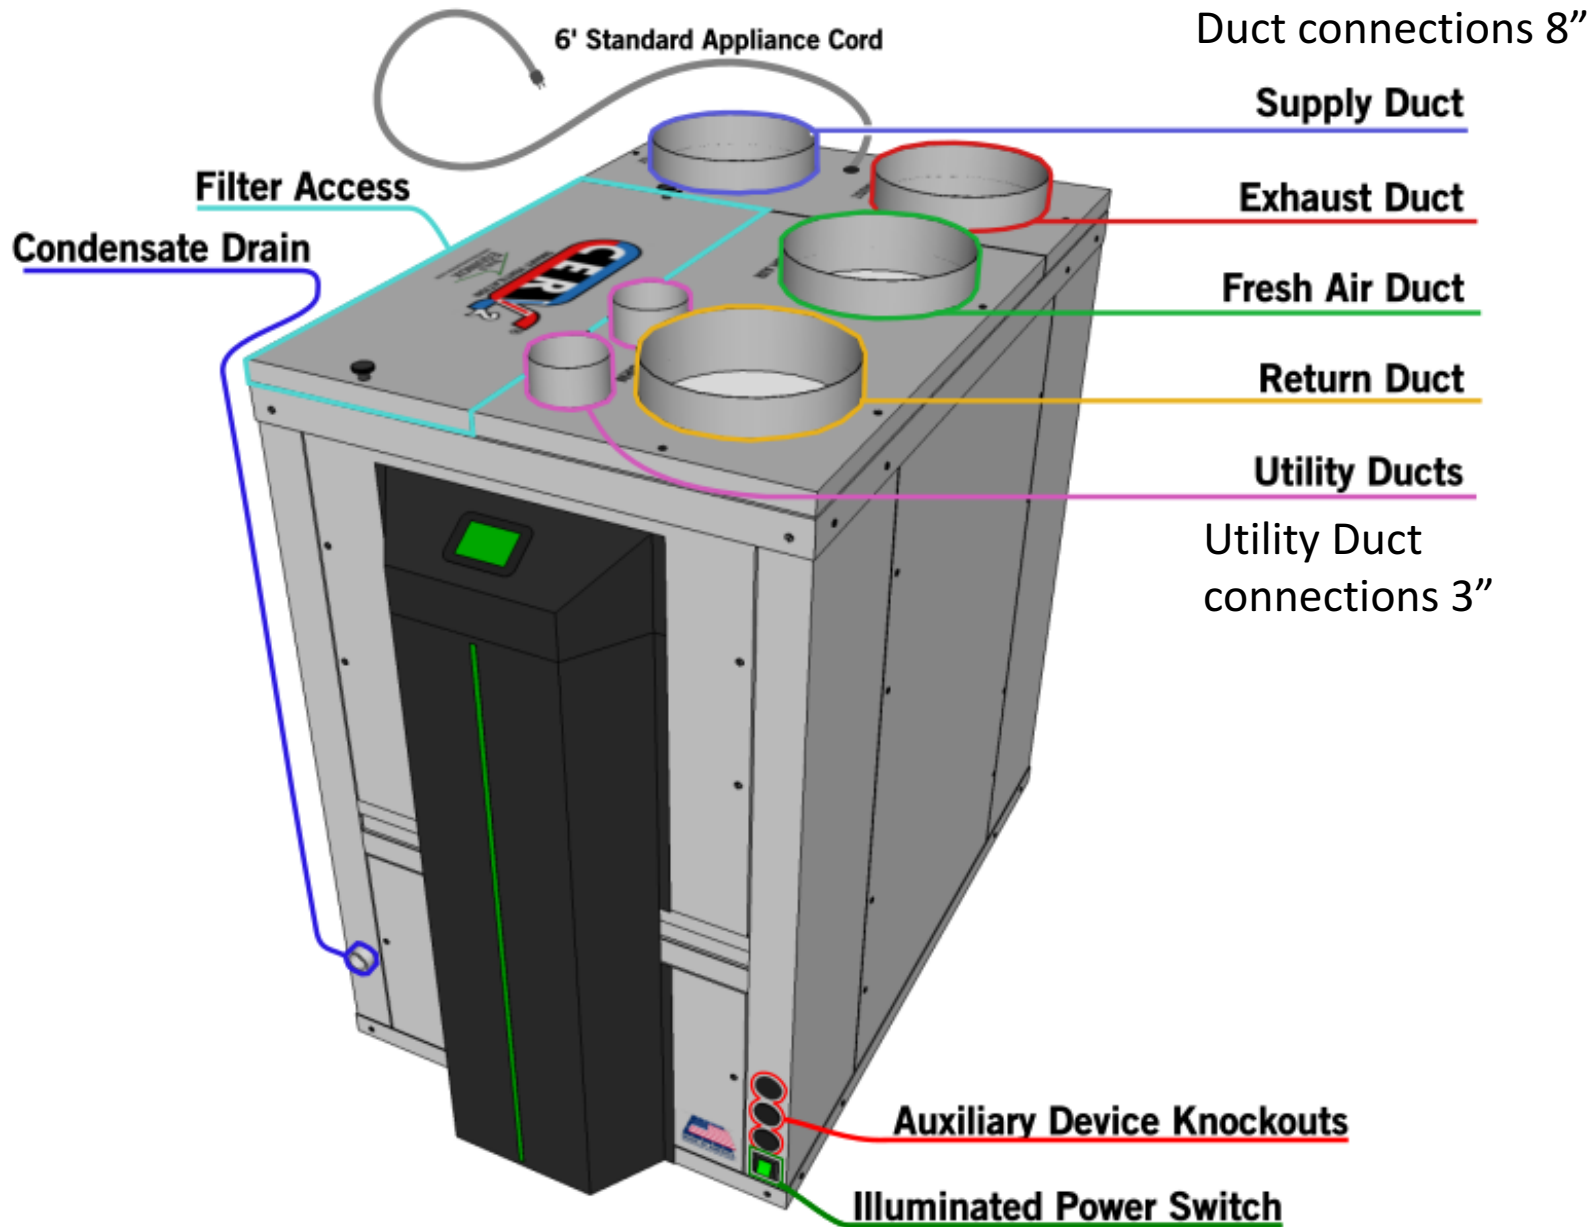

## Unitary All-in-One System

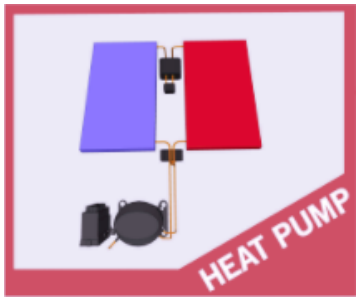

- Heat pump and dampers
- Fans – same ECM fans as current CERV
- Fresh air and return filters (10"x20"x1")
- Integrated color touch screen display

- Unpainted appliance grade aluminum construction for sharp look and easy end of life recyclability
- 8" duct connections for improved airflow performance

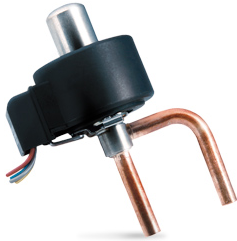

# CERV2 Configuration

# CERV2 Heat Pump Advancements

Same digitally controlled inverter drive  
variable speed compressor

Electronic expansion valve for increased  
efficiency and capacity control

Advanced aluminum microchannel heat exchangers

- Lightweight
- Reduced refrigerant charge
- High heat transfer performance
- Fully recyclable

## CERV2 display

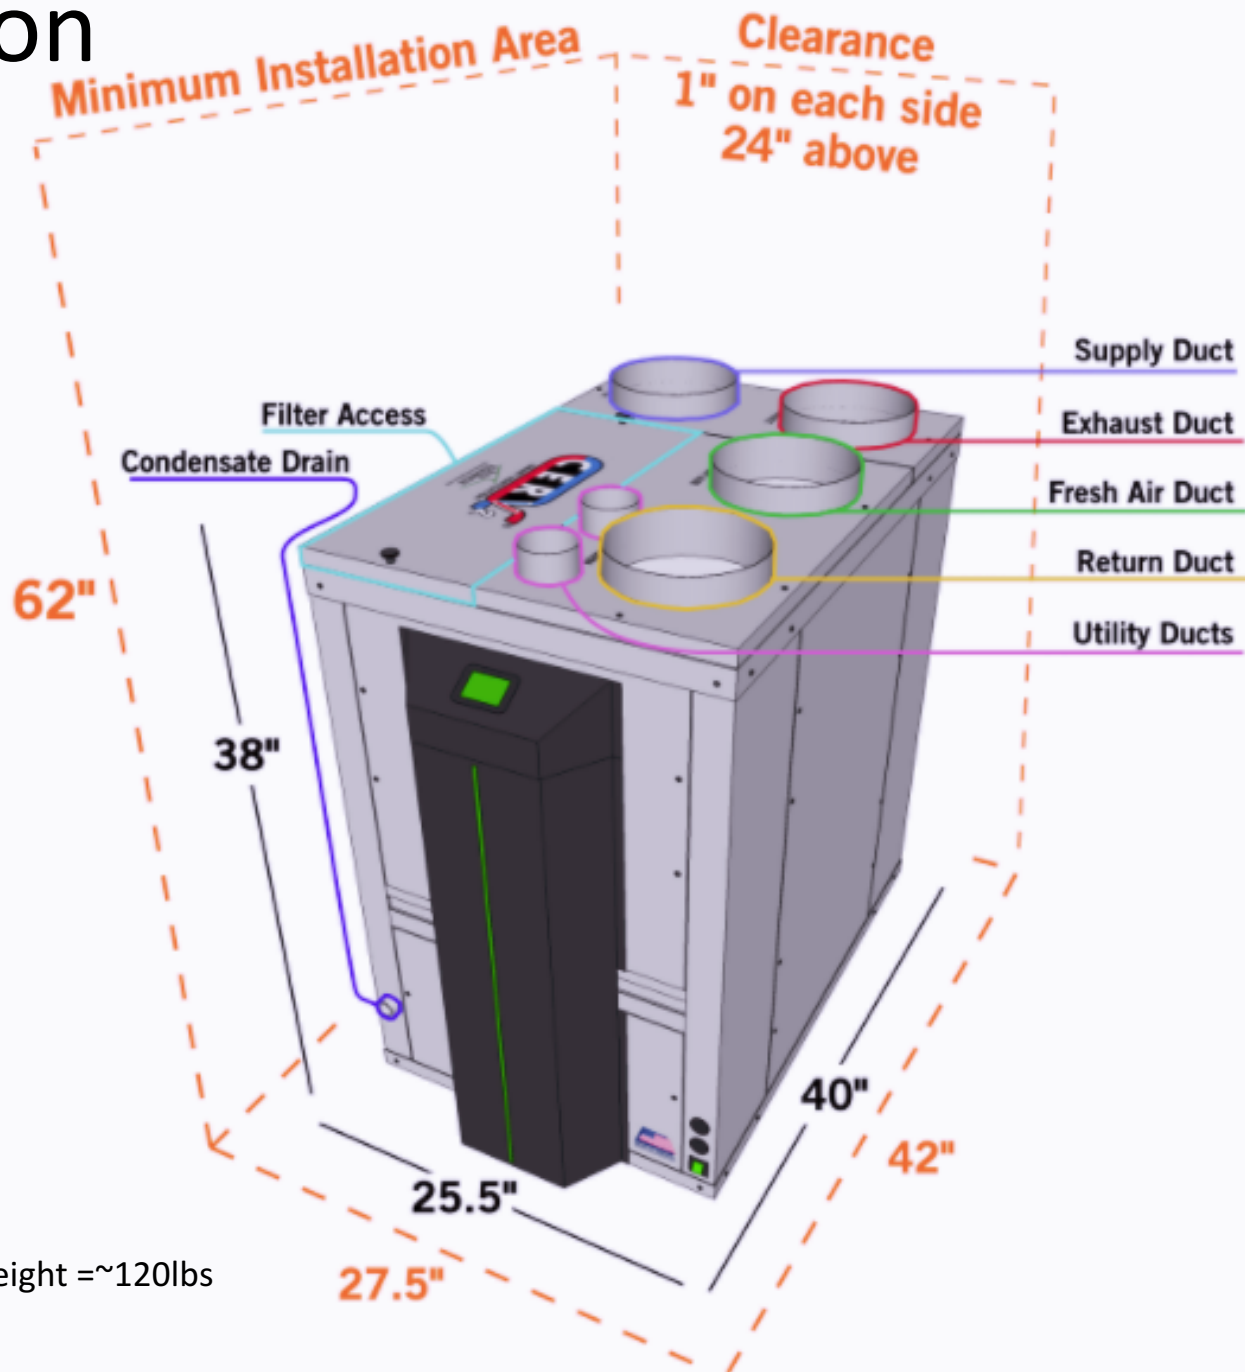

- Screen built into front of unit
- Color capacitive touch display
- 3.5" screen size
- Large, clear, and easy to navigate

## Optional Wireless CERV2 display

# Installation

Total Weight ≈ 120lbs

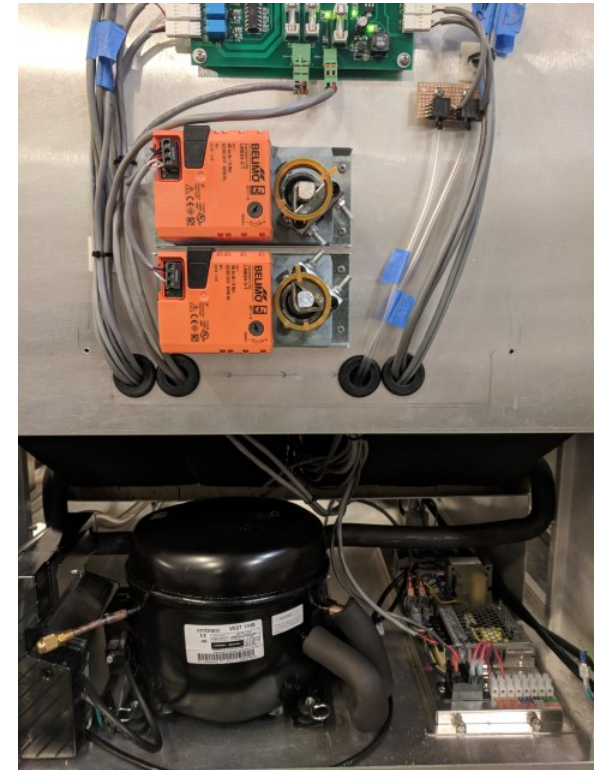

# Maintenance and Service

Front Access Panel Cover

Low Voltage Electronics &  
Damper Motor Access

120V Electronics, Aux  
Device Field Wiring, &  
Heat Pump Access

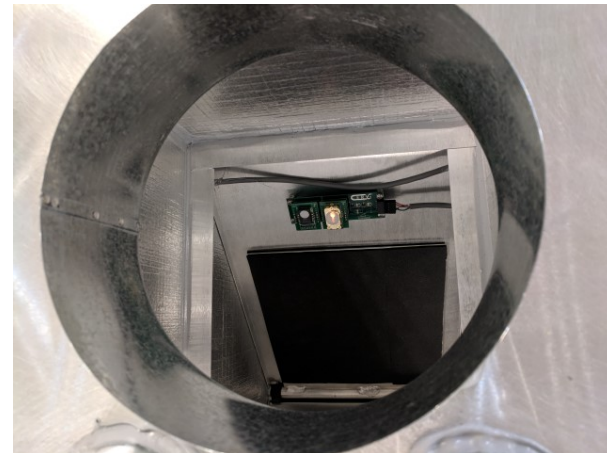

# Maintenance & Service

Removable 120V  
electronics panel,  
Auxiliary In/Out Wiring

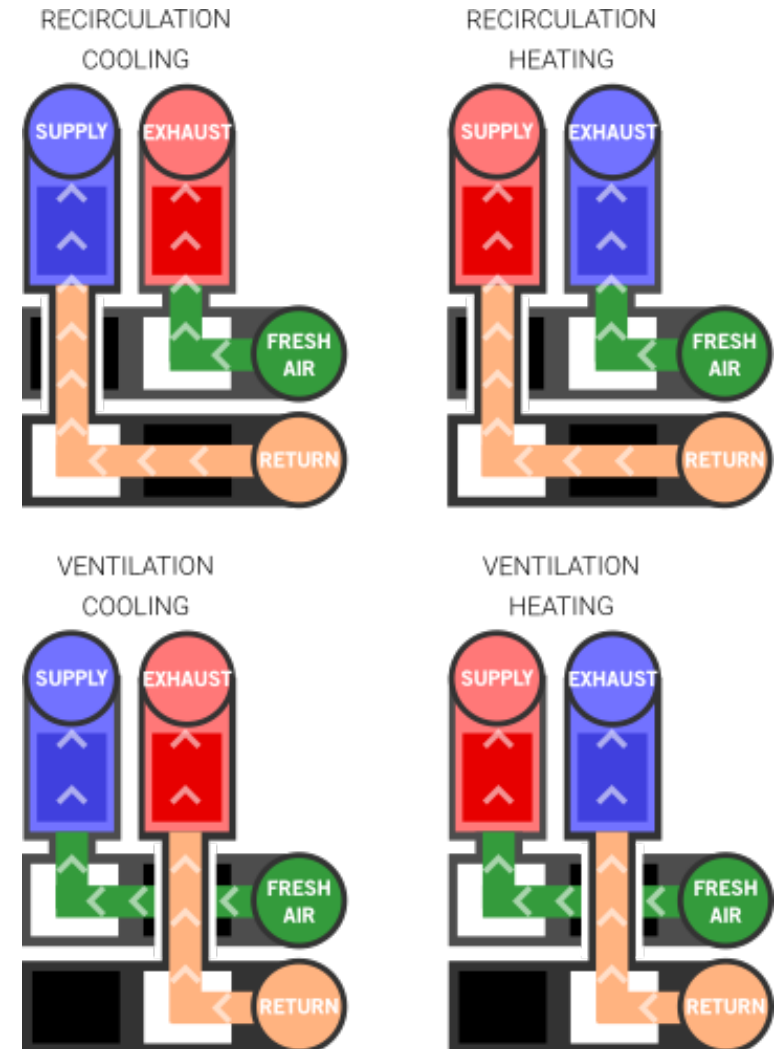

Return / Fresh  
Air Sensors

# CERV2 Operation

## CERV2 Operational Modes

# Monitoring

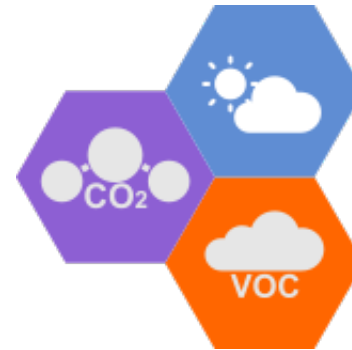

## Indoor Air Quality

## Temperature/Humidity

## Optional Outdoor Air Quality

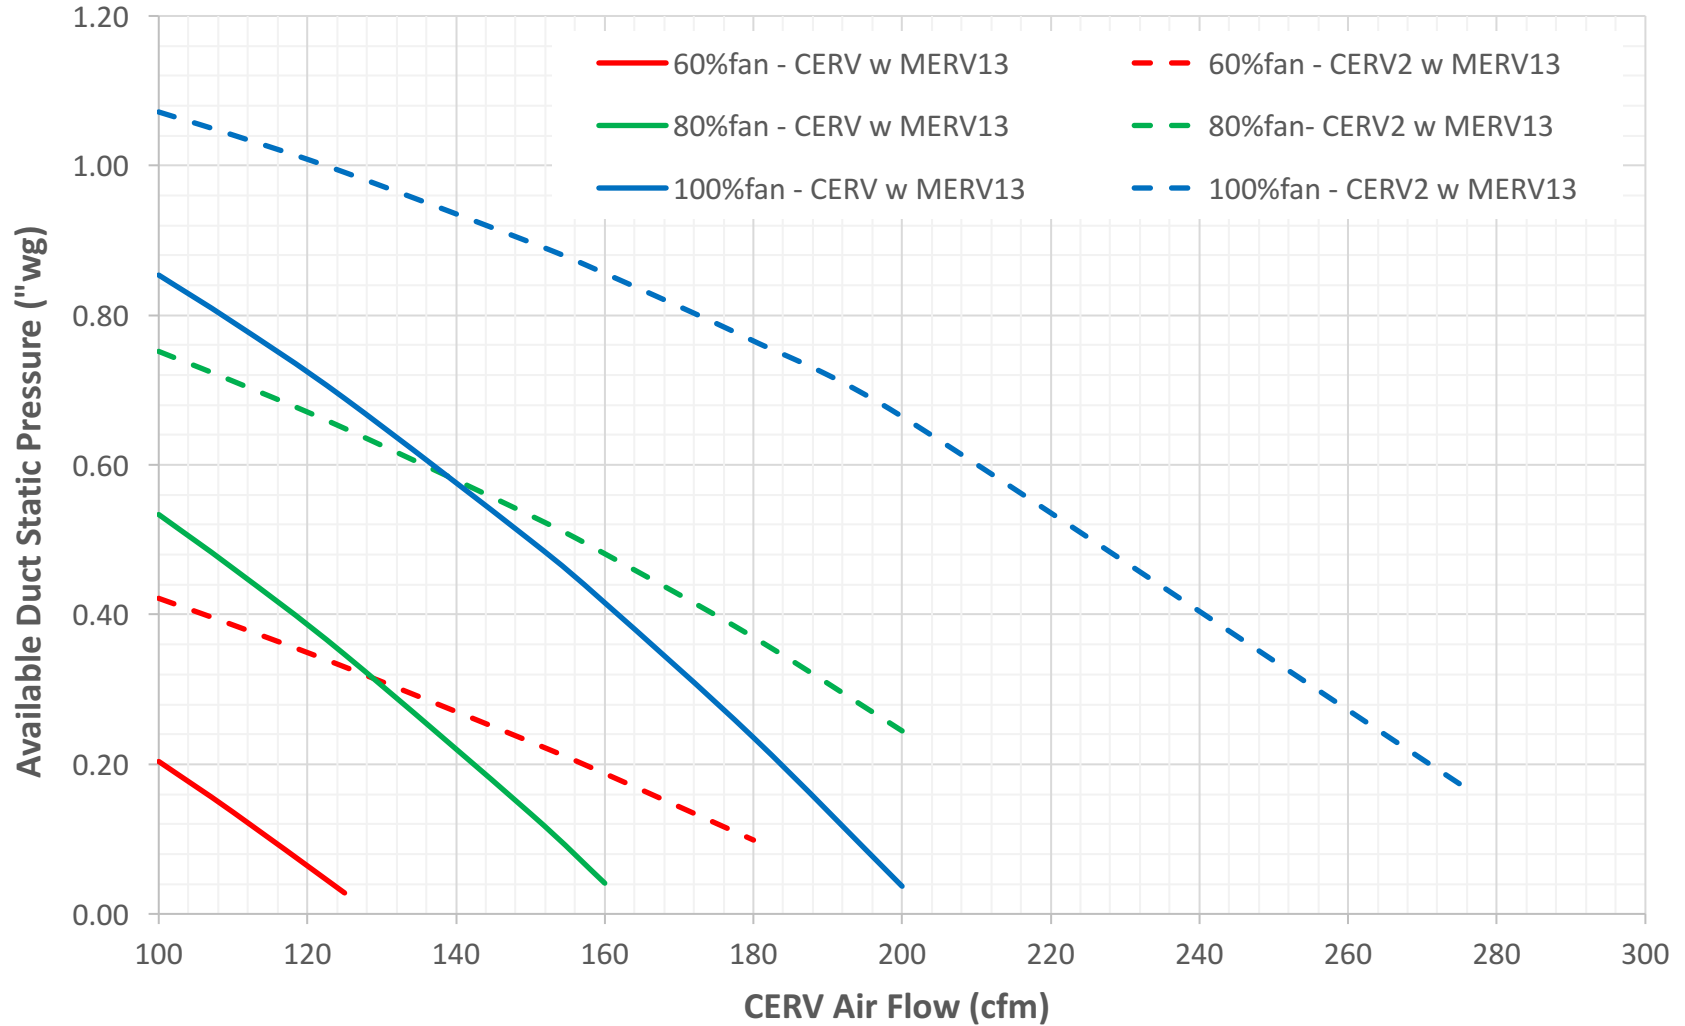

- Add on CO2 and/or VOC sensors for fresh air quality monitoring
- Locations with concerns about outdoor air pollution (wildfires, smog, etc)
- Modify ventilation based on outdoor air quality
- Change filters (charcoal) during outdoor pollution events

# Performance Summary

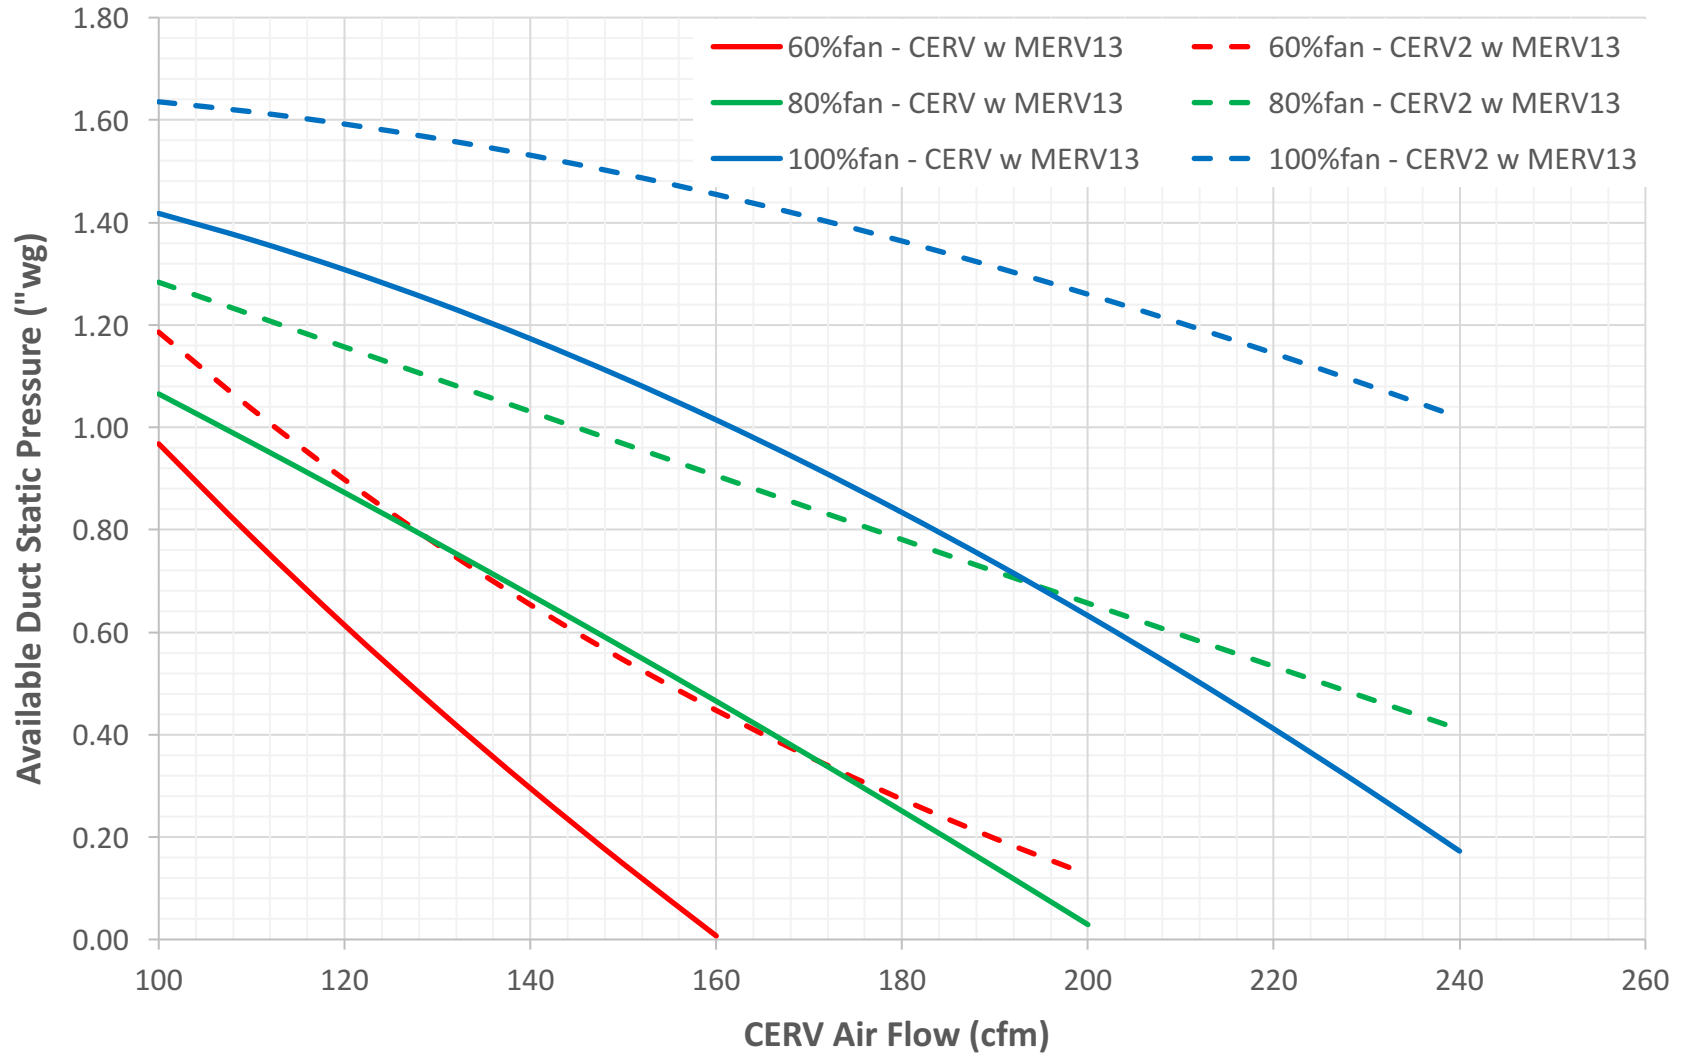

- Internal pressure loss is reduced
  - Better airflow capability
  - Fans operate at lower speed
  - Reduction in fan power
- CERV2 heating heat pump COP increase of 150%
- CERV2 has increased low temperature heating capacity
- CERV2 cooling heat pump COP increase 150%
- CERV2 cooling capacity similar to current 600-800W
- Latent removal ~10 liters per day

\*Performance parameters are preliminary

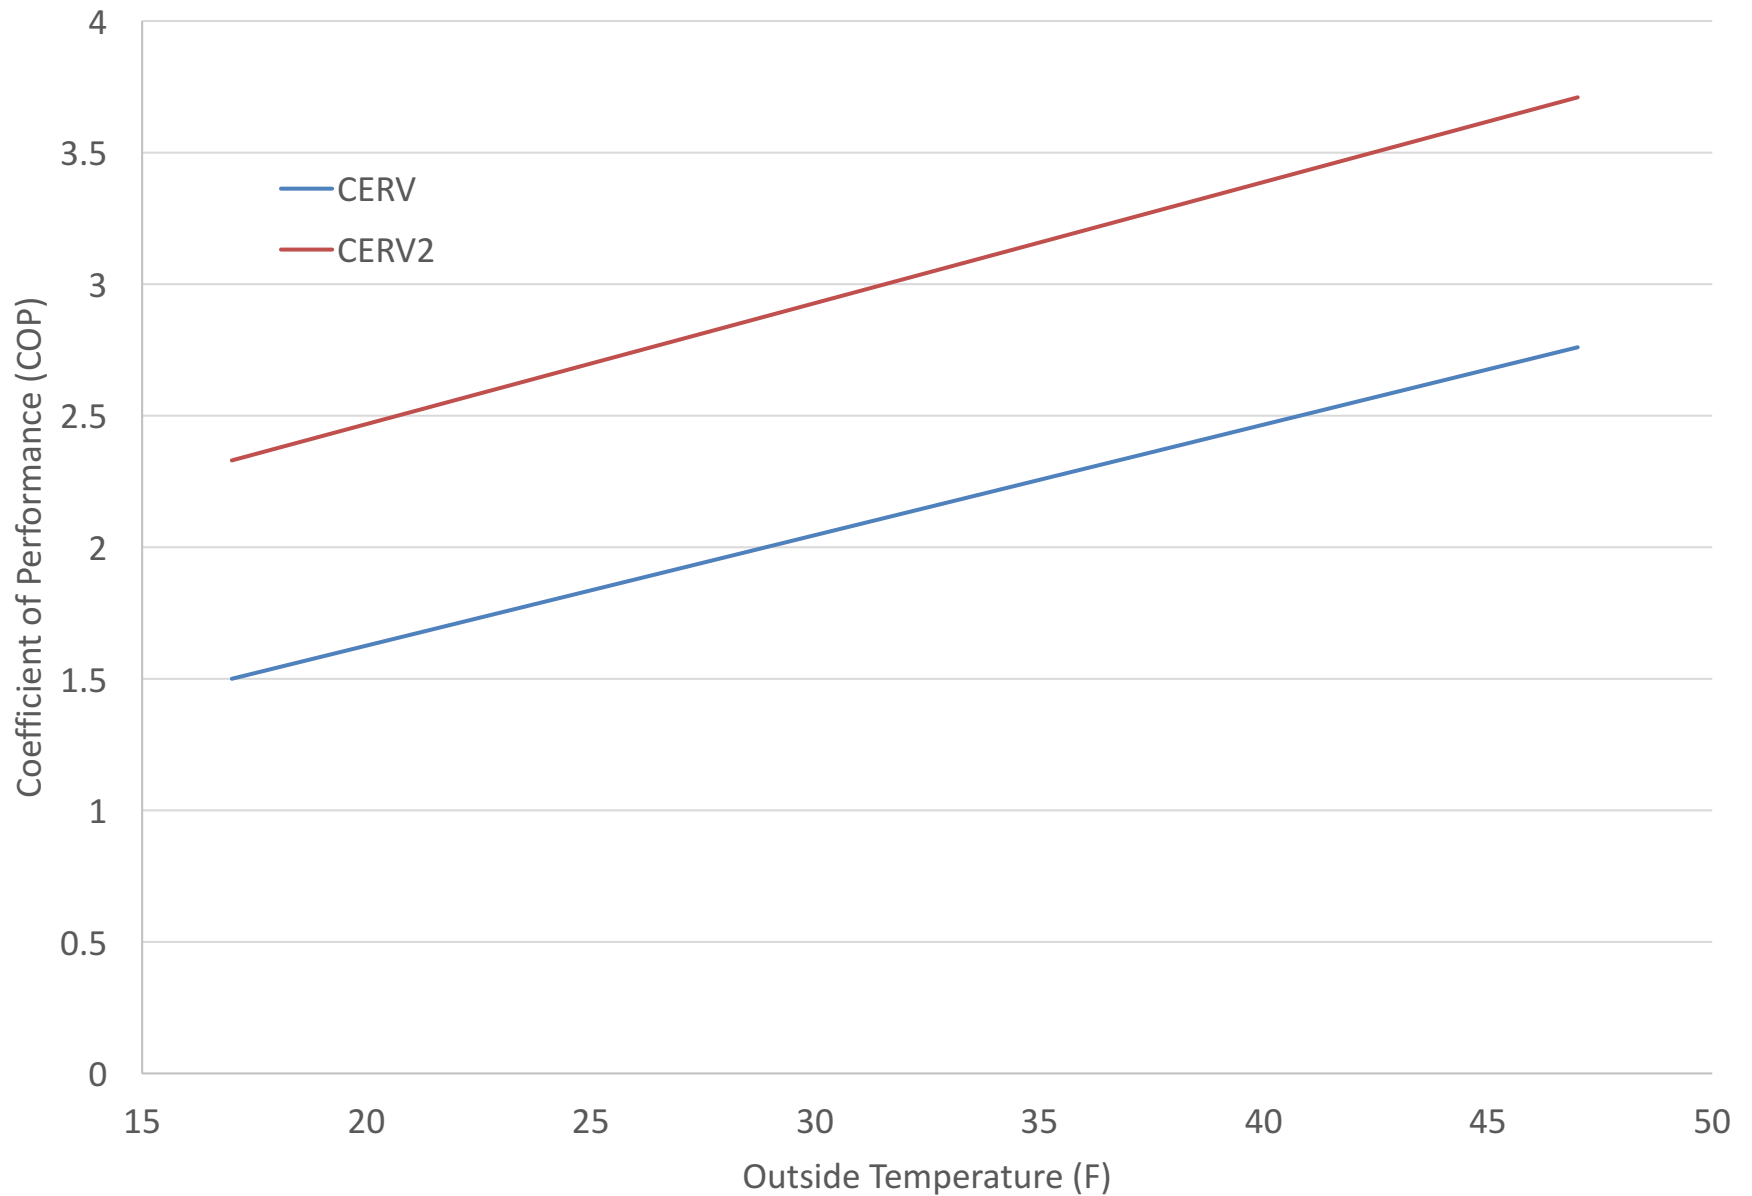

## Comparison CERV & CERV2 Available Static Pressure w prioAir6 fans

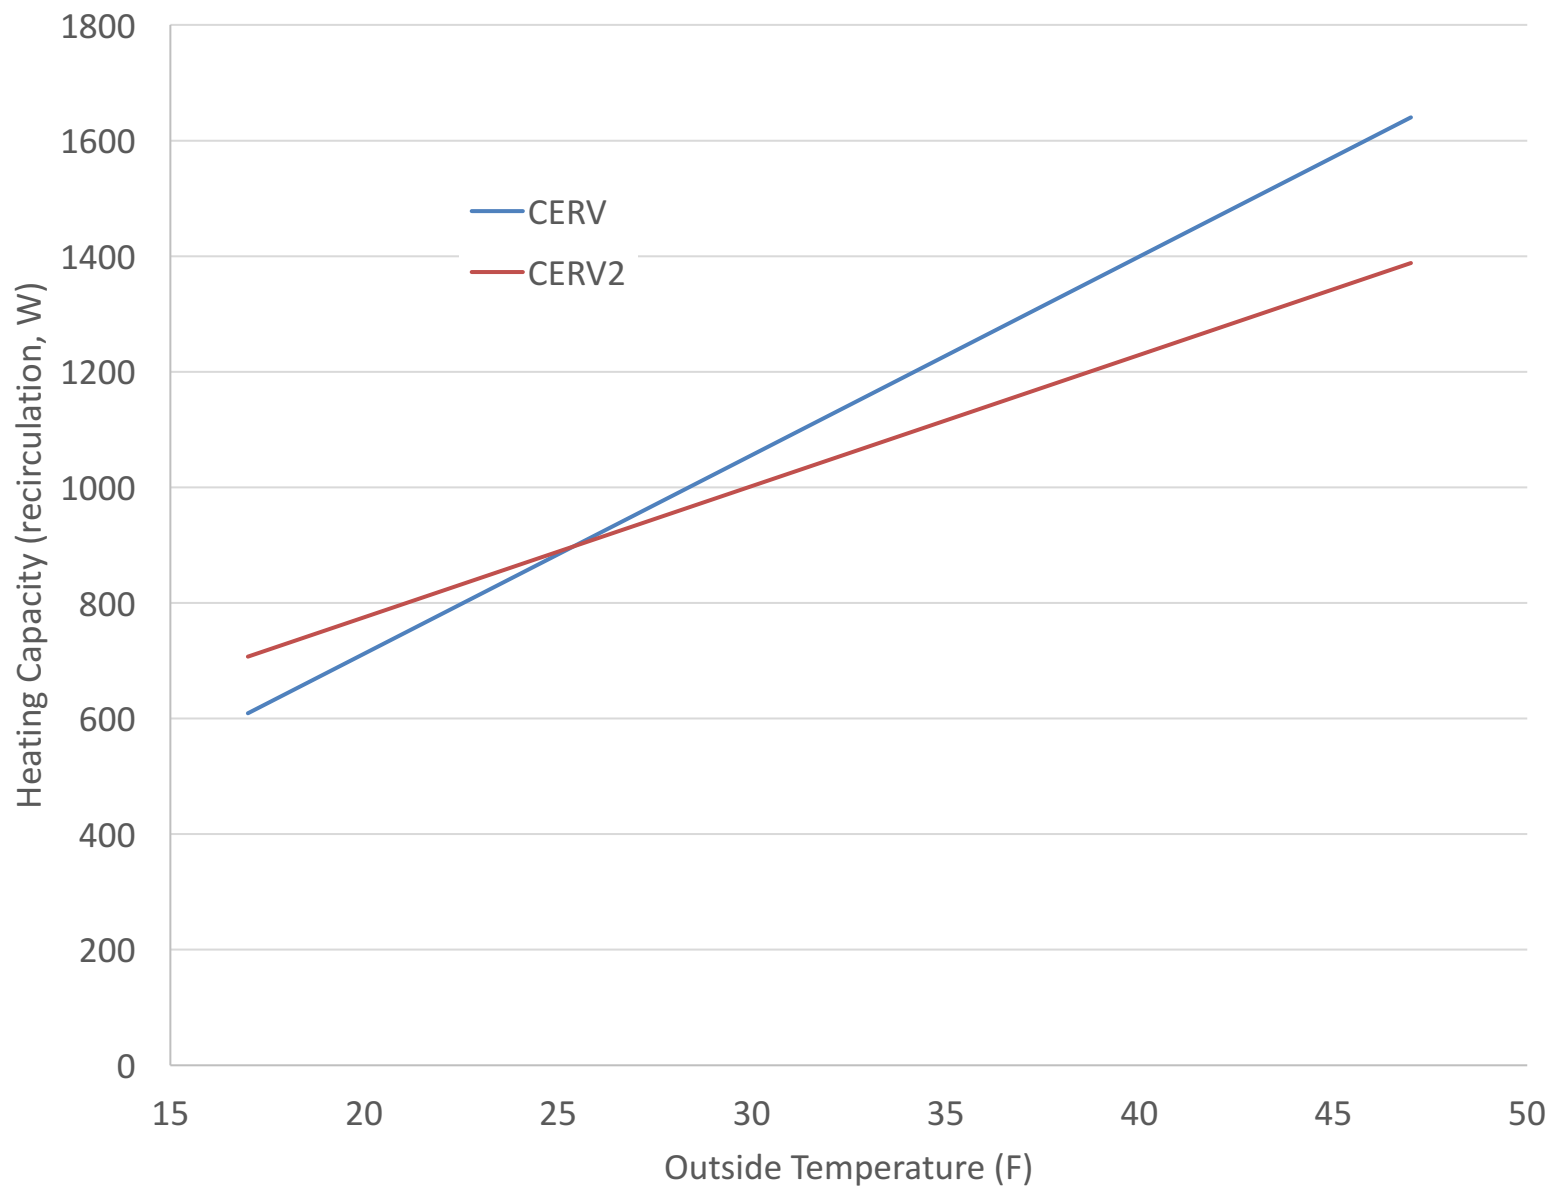

## Comparison CERV & CERV2 Available Static Pressure w prioAir8 fans

Comparison of CERV and CERV2 Recirculation Heat Efficiency

Comparison of CERV and CERV2 Recirculation Heat Capacity

**Features/Options**

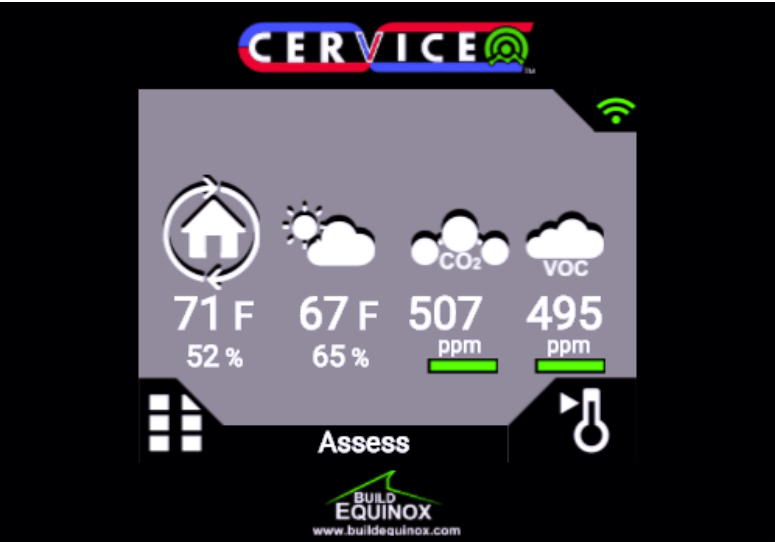

# Built-In Communication

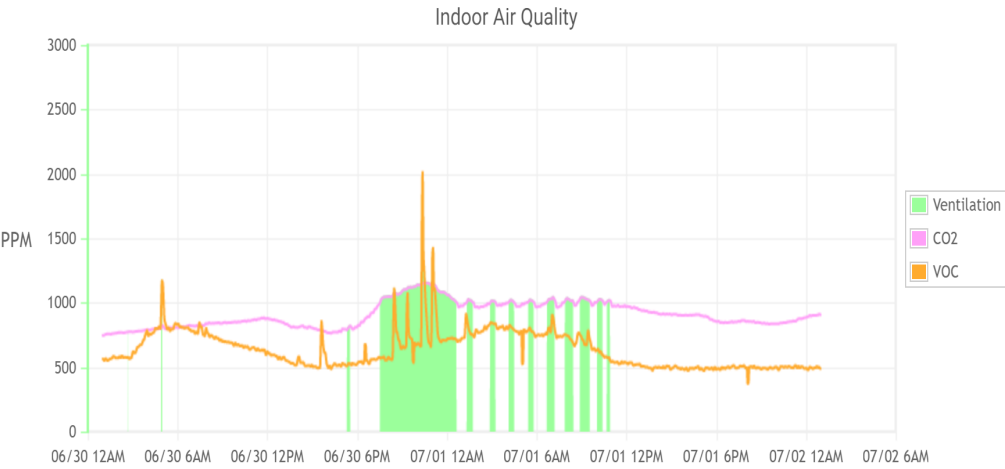

- Wifi and EnOcean communication are built-in standard
- CERV-ICE online interface for CERV control and historic data. It's free!
- OTA (over the air) software updates

With CERV-ICE your CERV will get better over time! Software updates and increased capabilities.

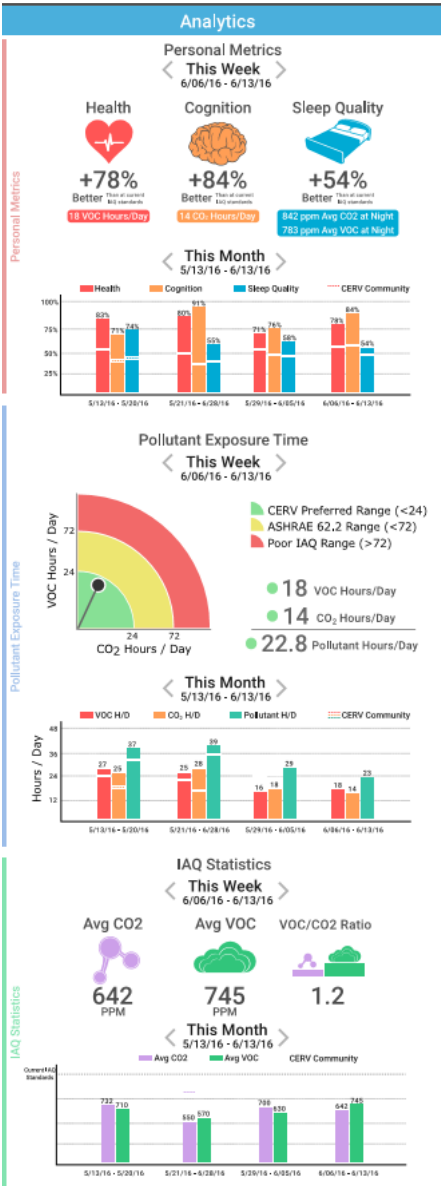

Online control

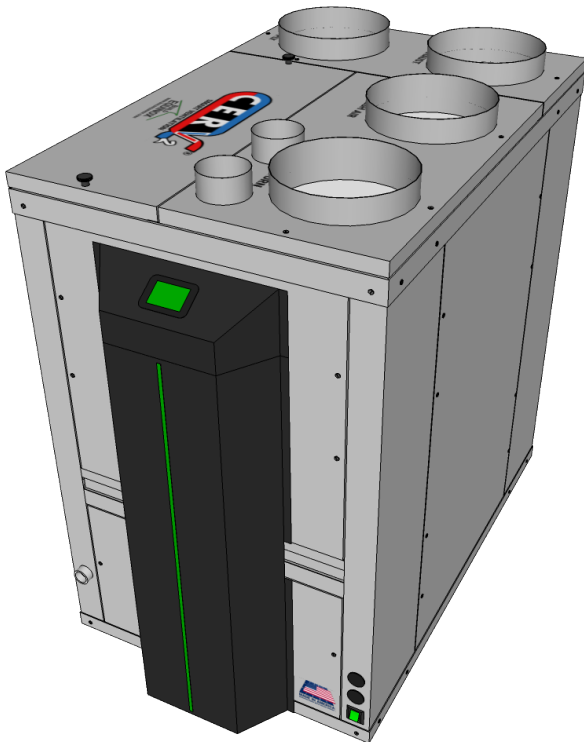

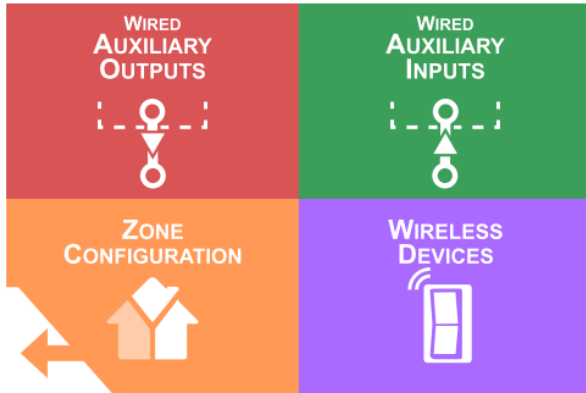

View and download historic data

# Analytics home health reporting

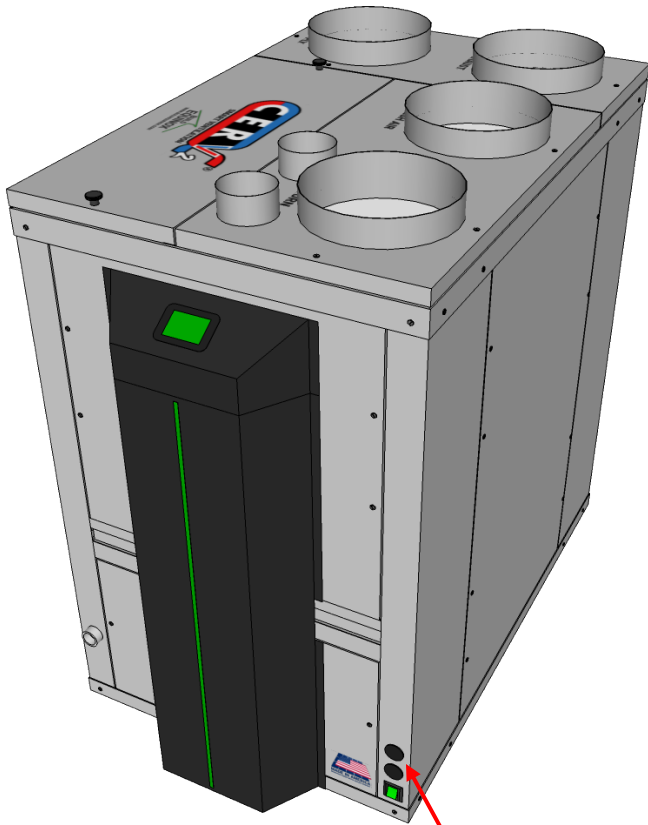

# CERV2 Communication to the Outside

- Wifi
  - CERV-ICE for online control and monitoring
- Wired Inputs
  - CERV detects inputs from external devices to trigger operation modes
  - 24V sense
  - Dry contact
- Wired Outputs
  - CERV controls external devices
  - Dry contact – NO or NC
  - 24VAC output
- Wireless EnOcean Devices

# CERV2 Wired I/O

Knockouts for making  
wired connections

## CERV2 I/O Built-in

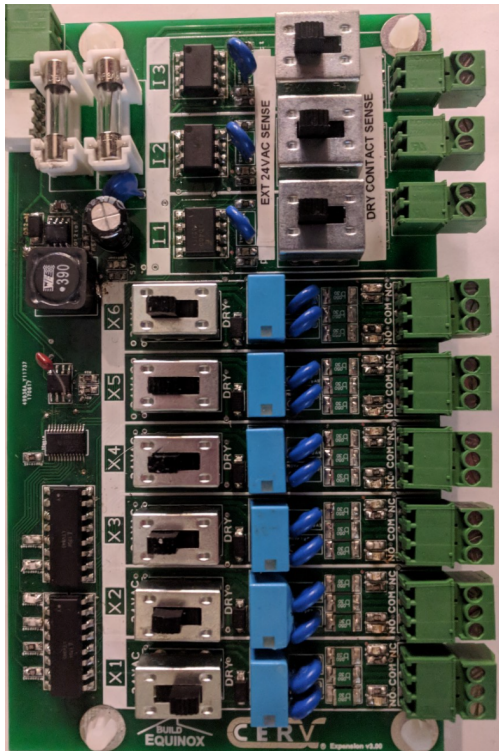

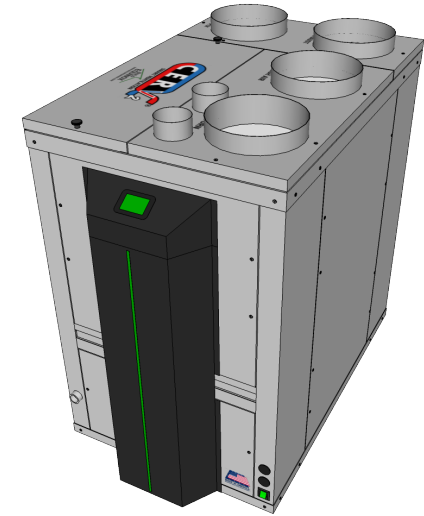

- One Output – X0
  - Dry contact NO, Comm, NC
  - Max 10A
- One 24VAC Output
  - Max 0.5A
- One Signal Input – I0
  - Dry contact or 24V sense
  - Max 24VAC

# Expansion Board Option

An additional 3 Input Channels and 6 Output Channels for wired external connections

## 3 Input Channels

- Set to either dry contact or 24VAC sense

## 6 Output Channels

- Set to either dry contact or 24VAC output

# Wired Inputs

## 4 Input Channels with Expansion Board

- Set to either dry contact or 24VAC sense
- CERV detects inputs from external devices to trigger operation modes
- Trigger Modes
  - Vent
  - Heat
  - Cool
  - Recirc
  - Stop

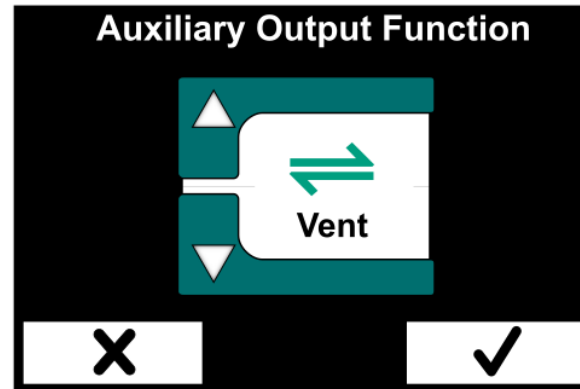

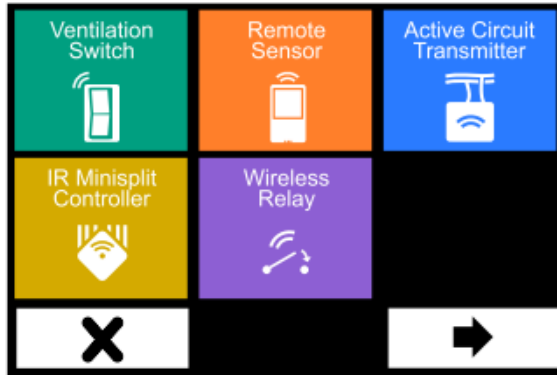

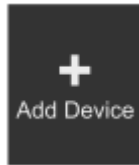

# Wired Outputs

## 7 Wired Output Channels with Expansion Board

- Set to either dry contact or 24VAC output
- CERV triggers an external device
  - Heating
  - Cooling
  - Venting
  - Humidity
  - Geo-Boost
  - Zone Dampers
  - Fan Interlock

# Wireless Devices

- EnOcean low power wireless communication
- Can add up to 18 wireless devices
- Use devices to trigger, sense, and control

## Wireless Switches

- Trigger venting

## Active Circuit Transmitters

- 24VAC/DC or 120-277VAC
- Sense when circuit is active (light, vent hood, etc)

## Remote Sensing

- Temp, humidity, CO2
- Pair with external heat, cool, dehum, vent control

## Wireless Relays

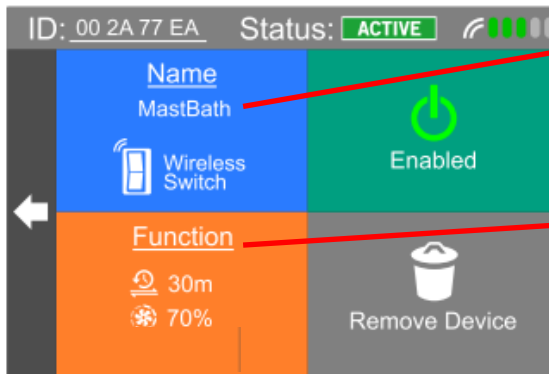

- 24VAC/DC or 120-277VAC
- Trigger an external device
- Same config as wired aux

# Remote Venting

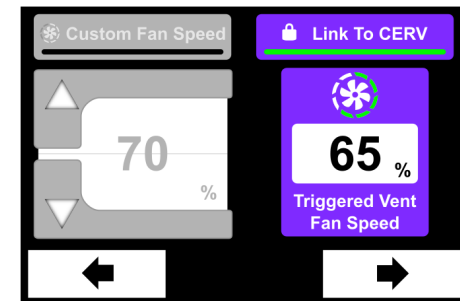

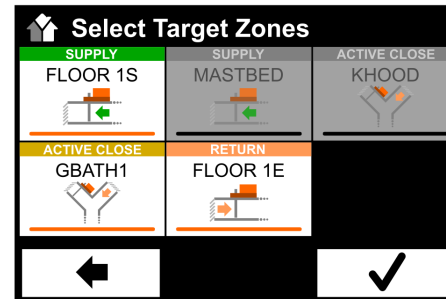

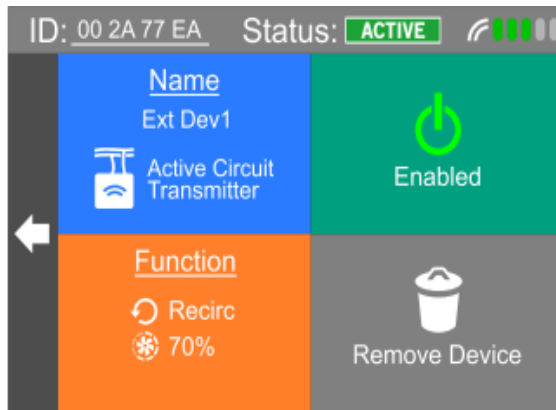

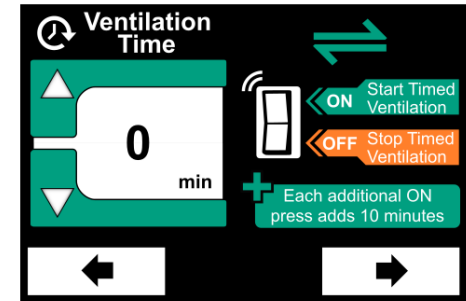

Wireless, battery free switch options for on-demand timed ventilation (i.e. kitchen, bathroom spot ventilation)

Wall switches or ACTs (active circuit transmitters)

Add Custom Name

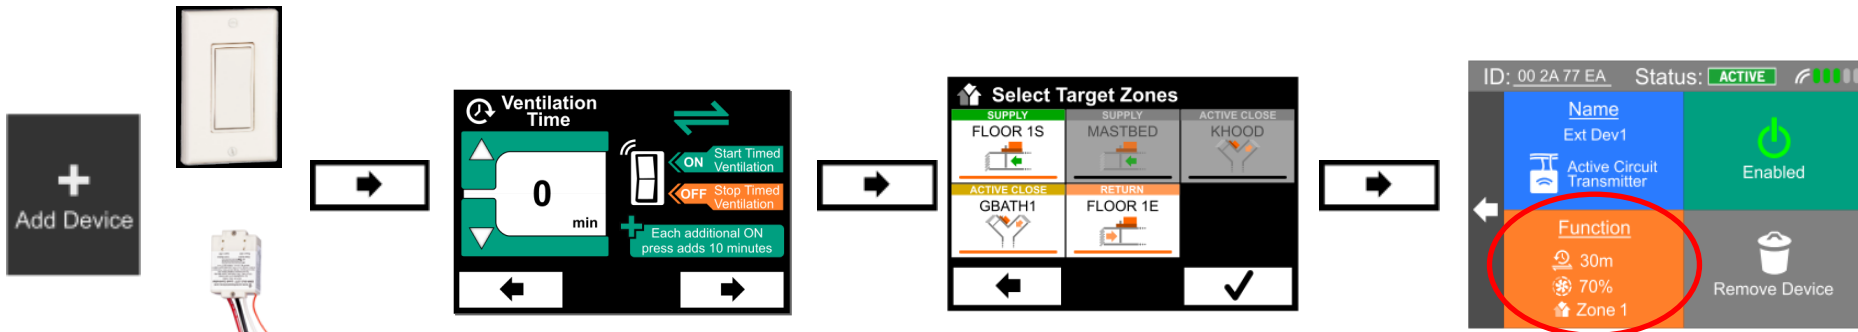

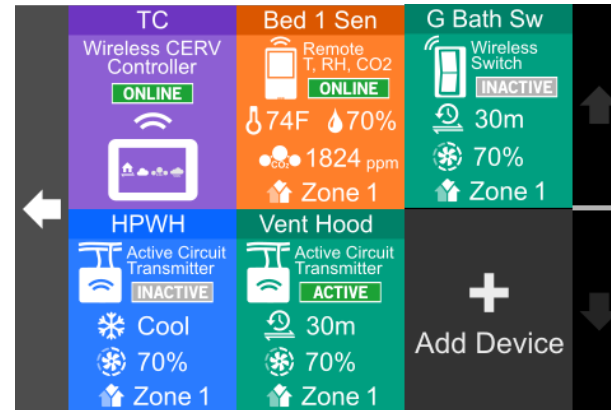

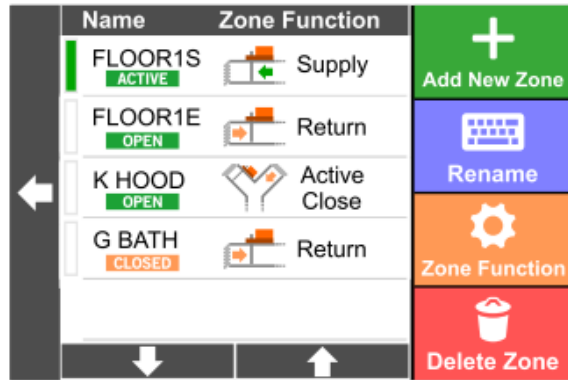

- Set vent length
- Set fan speed
- Set linked zone

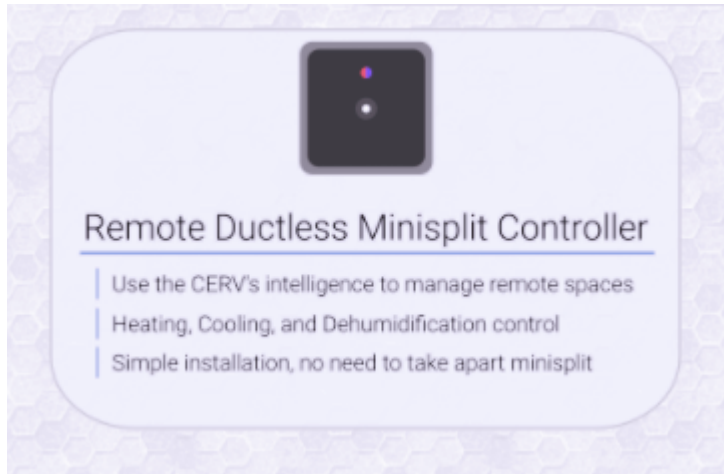

# Zone Dampers

CERV2 has increased zoning capability

- Increases airflow to the specific zone when active
  - Link wireless switches to zones
  - Boost exhaust air from bathrooms/kitchens
  - Supply zones can direct fresh air to certain locations (bedrooms, living rooms)

# Future

# Availability

- Currently taking orders/ production underway – non-UL Listed systems
- Initial orders started shipping in March – non UL only
- UL Certification is underway
- Q1 '18 CERV2 UL Listing expected completion
- Q2 '18 transition production to UL Listed units

# Stay Informed:

- Monthly Newsletter signup on our website  
<http://buildequinox.com/#learnmore>
- On website under “News” find past newsletter articles, archived webinar videos, and reports/publications
  - “New IAQ Metrics Webinar” has in depth information on air quality and CERV-ICE Analytics
- Contact us with any questions or for more information

Thank you!
